

ANDRÉS LAPUENTE SOLA

Data Analyst / Data Engineer in training | Big Data & AI | Developer

640 85 39 58

My portfolio

andreslapsol@gmail.com

Córdoba,, España

About me

Junior developer with experience in backend development with Symfony, database management, API validation, testing, and software optimization, currently steering my career toward Data Analyst / Data Engineer roles. I have a solid technical foundation in development, SQL, database administration, and working with structured information, which I complement with training in Artificial Intelligence and Big Data. I am interested in adding value in environments where data, automation, analysis, and continuous process improvement come together.

Education

Intermediate Vocational Degree in Microcomputer Systems and Networks
IES Antonio Gala
2021 -2023

Higher Vocational Degree in Cross-Platform Application DevelopmentIES Antonio Gala
2023-2025

Specialization in Artificial Intelligence and Big Da*~
IES Gran Cápitan
In progress

- Training focused on the design and implementation of AI systems to optimize processes and support business decision-making. Application of Big Data solutions for processing and analyzing large volumes of information. Development of skills in automation, data analysis, and digital transformation.

Skills

- Teamwork.
- Creativity.
- Public speaking.
- Critical thinking.
- Leadership.
- Continuous learning.

Experience

SW/MM Analyst and Designer - Azabache Ingeniería

Córdoba / Present

- Development with PHP frameworks Laravel, Yii 1.0, and Symfony, applying best practices.
- Development and optimization of Symfony applications, applying secure, maintainable, and scalable architectures.
- Management of relational databases, including data structuring, queries, maintenance, and support for business logic.
- Performance optimization of applications and review of backend processes to improve stability and efficiency.
- Customization of websites in WordPress with Divi Builder, improving user experience and responsive adaptation.
- Management of repositories in GitHub through version control, branches, merges, and collaborative teamwork.
- Continuous work with structured data within web applications, ensuring integrity, efficient access, and support for system functionality.

Developer and Tester - Filmijob SL

Remote / 2025

- Secure implementation of private features for program administrators.
- Writing and optimizing prompts for AI to improve response quality.
- Thorough software testing, bug detection, and performance optimization.
- API development and validation with Postman and integration with other systems.
- Agile database administration using Adminer.
- Reverse engineering of critical modules to analyze and improve their architecture.

Certificates

Introduction to AI Development Course
BIG school
2025

Languages

English (B1 Certificate)
Spanish (Native language)

Computer Technician - Chiocciola Computer
Montesilvano PE, Italy / 2023

- Repair of computer equipment and customer service for 3 months in a foreign company (Pescara, Italy), as part of the practical training for the intermediate vocational degree.
- Customer service in both English and Italian.
- Diagnosis of hardware and software failures.
- Formatting and installation of operating systems (Windows, Linux, etc.).
- Installation and updating of drivers and software.
- Configuration of local networks (LAN) and troubleshooting connectivity issues.
- On-site and phone technical support for customers.
- Support in sales of technology products and technical advice to customers.
